

Ce e Fedora, ce aduce nou Fedora 12

Prezinta: Nicu Buculei – contribuitor Fedora

Ce este Fedora?

- Distributia Linux si Proiectul Fedora: nu doar o distributie Linux ci un proiect comunitar;
- Distributia – cel mai cunoscut component;
- Dincolo de distributie:
 - Gazduire proiecte (fedorahosted);
 - Sistem de build (Koji);
 - Extra Packages for Enterprise Linux (EPEL);
 - Platforma pentru aplicatii web colaborative (Moksha);
 - Infrastructura, etc.
- Red Hat: contribuitor si sponsor
- Mantra: upstream
- Distributii derivate: RHEL, CentOS etc.

Cui se adreseaza Fedora?

"Fedora is a Linux-based operating system that showcases the latest in free and open source software. Fedora is **always free for anyone to use, modify, and distribute**. It is built by people across the globe who work together as a community: the Fedora Project. The Fedora Project is open and anyone is welcome to join.

The Fedora Project is out front for you, **leading the advancement of free, open software and content**. "(www.fedoraproject.org)

- Un produs nu poate fi totul pentru toata lumea

Cele 4 fundatii

- **Libertate:** chiar daca are unele costuri;
- **Comunitate:** totul se petrece in comunitate;
- **Functionalitate:** distro X versiunea N = Fedora versiunea precedenta (de multe ori);
- **Primii:** cineva trebuie sa o faca.

Peste **15 milioane de utilizatori**: probabil nu facem ceva total gresit :P
