

Fedora - comunitate

(vazuta prin ochii unui contribuitor la Fedora Art)

Prezentare de: Nicu Buculei - <http://nicubunu.ro/>

Fedora - comunitate

- Fedora este un **proiect comunitar**;
- Comunitate de comunitati:
 - SIG-uri (Special Interest Group) – KDE, games, fonts, astronomy, etc.
 - Ambassadors
 - Comunitati externe: FedoraForum, Livna, FedoraUnity, Centos etc
- Fedora **nu** este o democratie ci o **meritocratie**
- Democratia in actiune: vot public in unele situatii (alegere board, nume pentru release).

Wallpapere

Fedora Core 5:
"Bubble" - sfirsitul unei ere

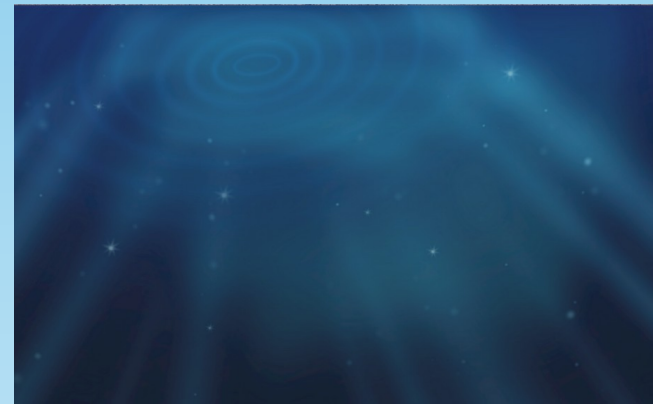

Fedora Core 6:
DNA - inceputuri

Fedora 7: o rascruce -
"ne place rezultatul dar
nu si procesul"

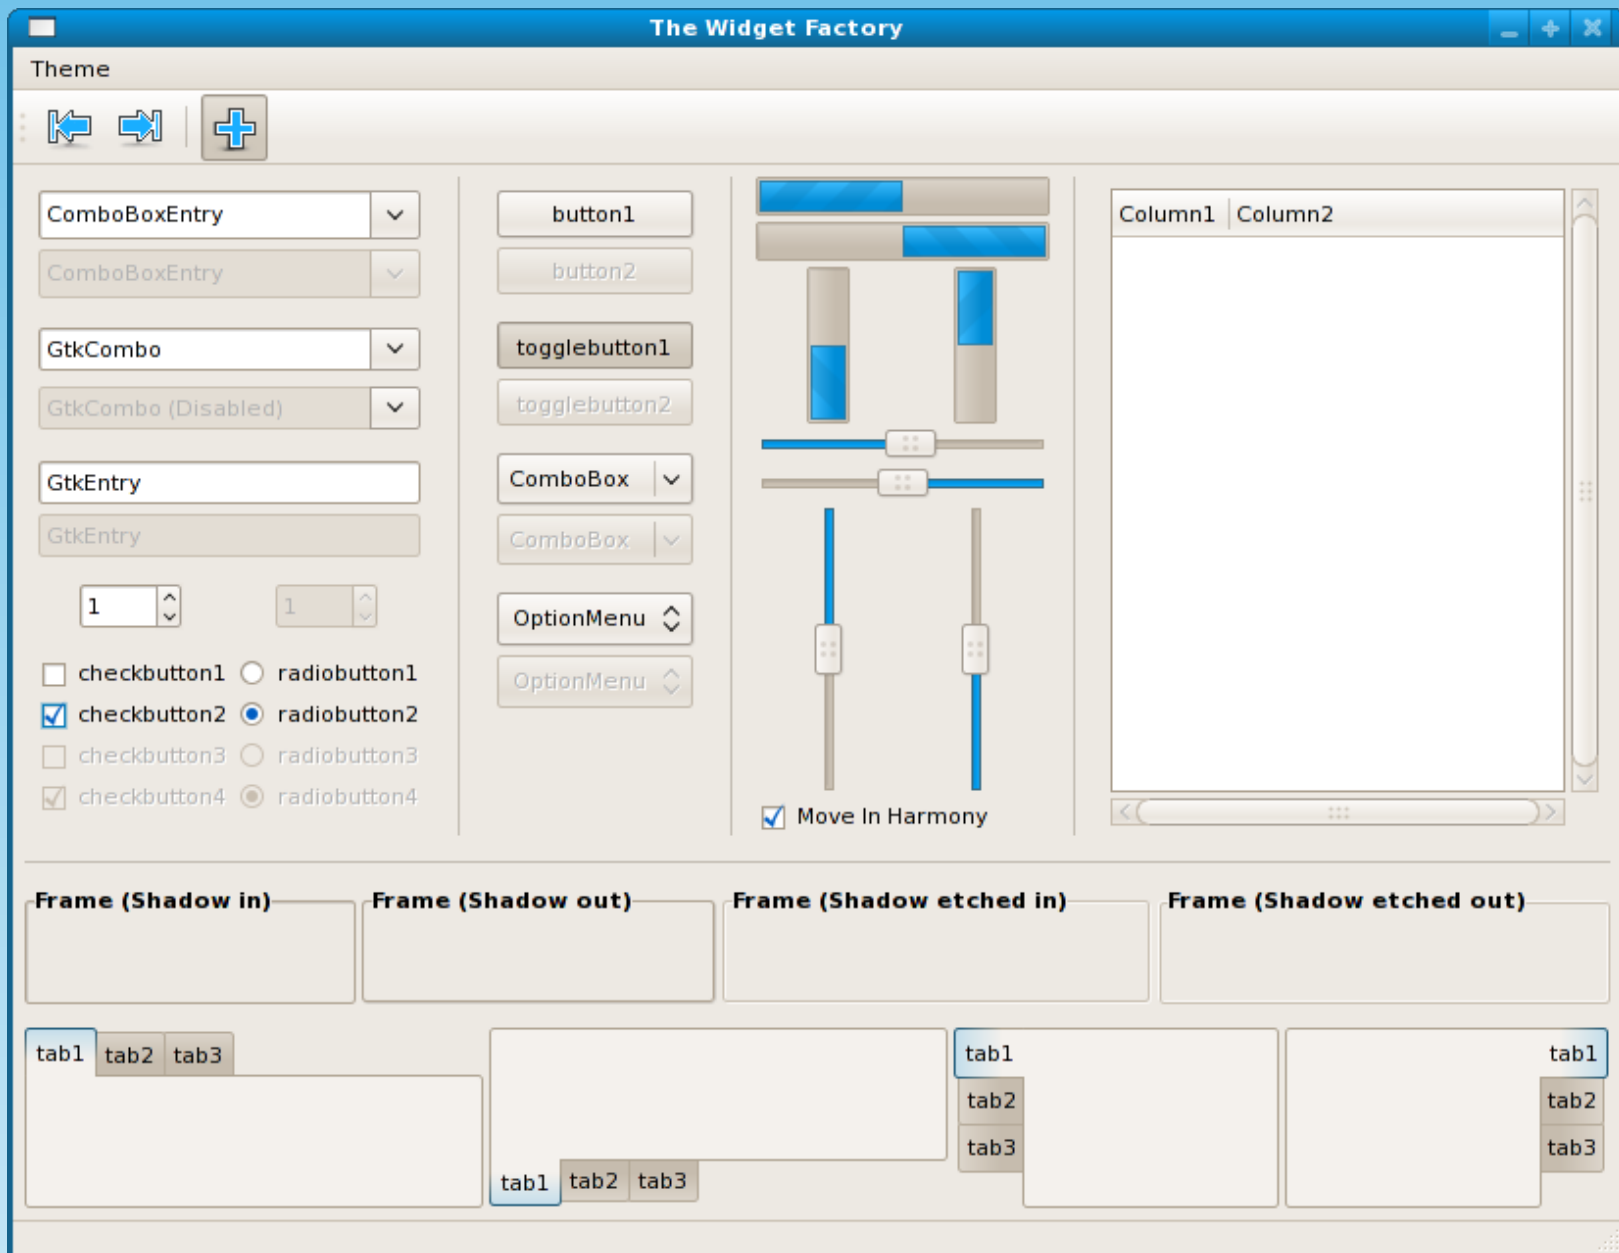

Fedora 8:
Infinity - afirmare

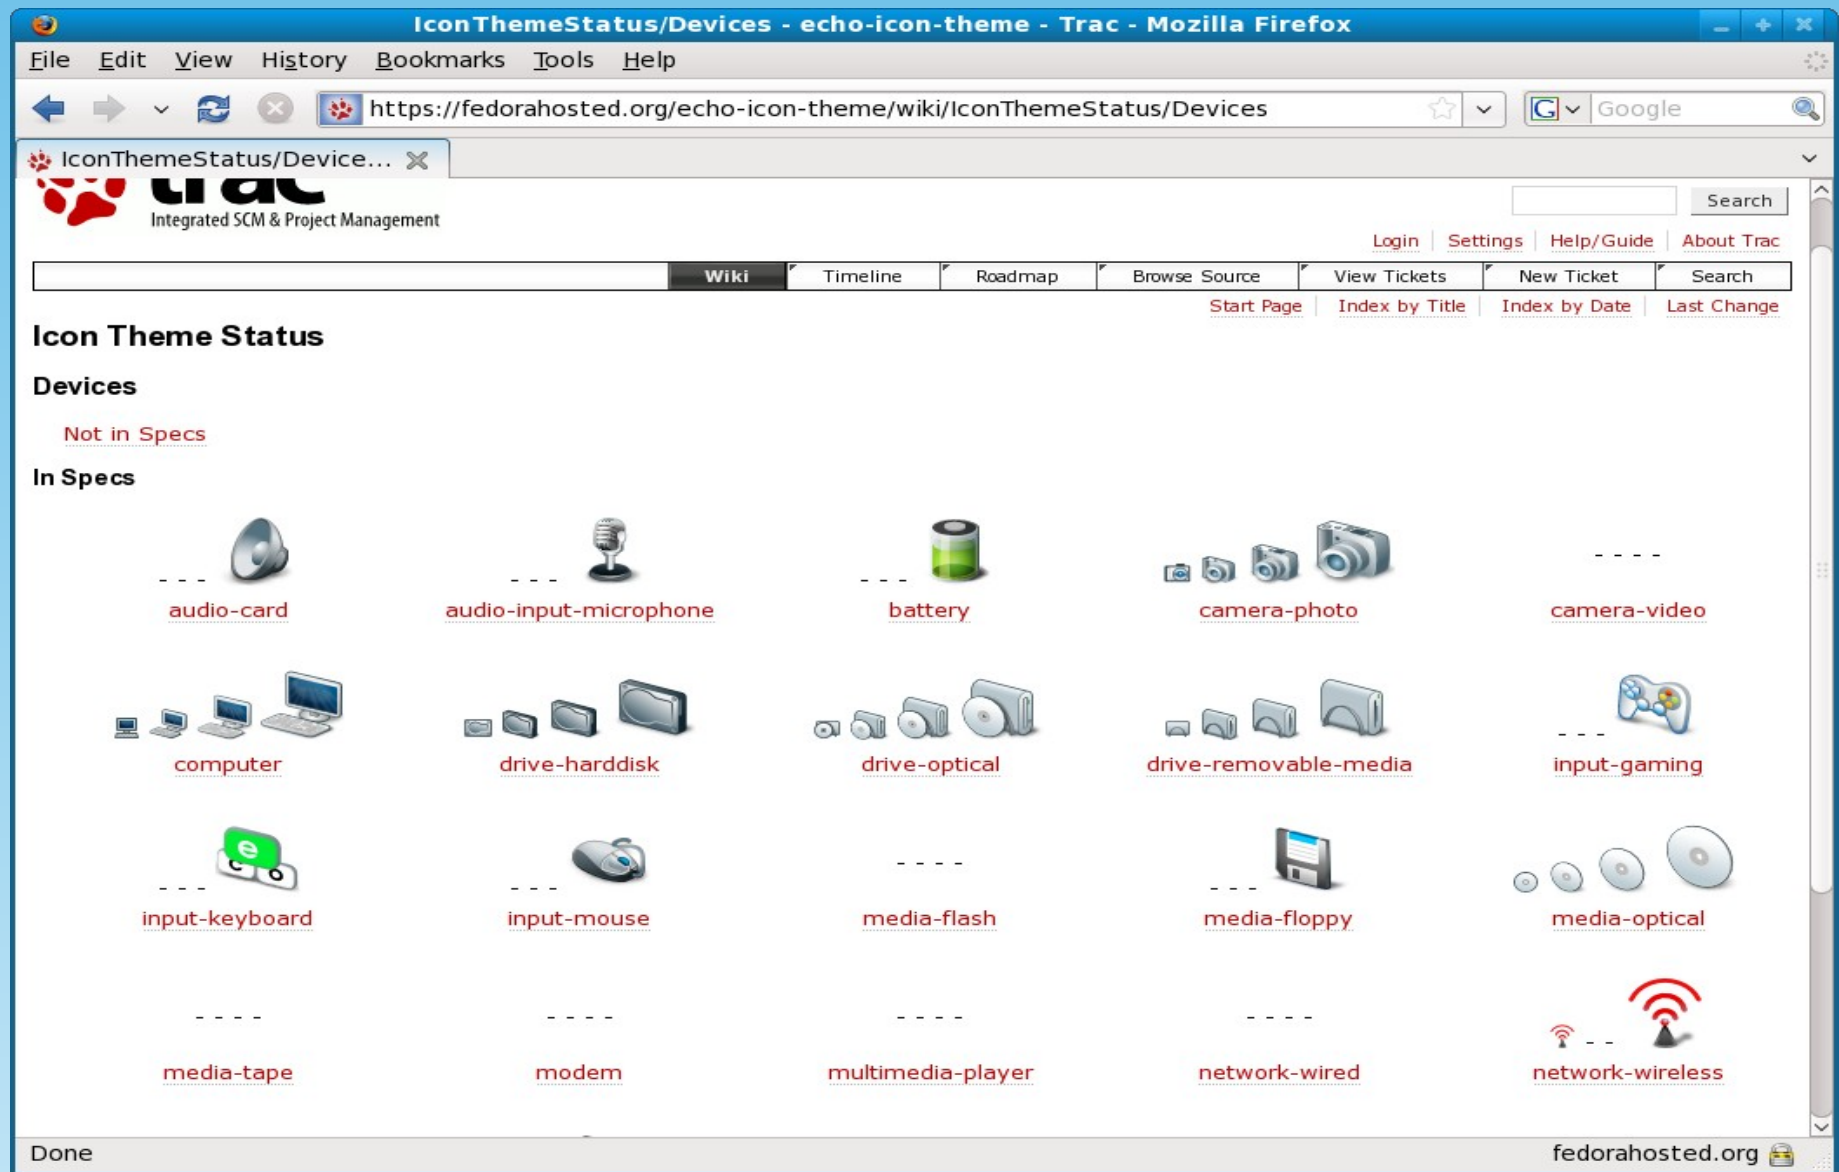

Fedora 9:
Waves - confirmare

Tema iconuri Echo

Art Team - principii, lectii invatate

- Libertatea nu este importanta numai teoretic, formatele deschise sint vitale pentru colaborare deschisa
- “Eat our own dog food”
- Showcase – demonstratie a ce se poate face cu un desktop Linux si increderea noastra de a utiliza acest desktop
- Bariera de intrare cit mai joasa
- Branding cit mai redus pentru reuzabilitate
- Se accepta numai critici constructive (nu “Echo sucks”)
- Cel mai bun mod de a vota cu ceva este prin contributia personala
- Uneori lista de mail + wiki nu e de ajuns

Infrastructura Fedora

- Libera in intregime, bazata numai pe solutii Open Source
- Administrata in cadrul unei echipe deschise, formata din voluntari
- Are la baza FAS – Fedora Account System
